Preserve Municipal Housing Authority

On February 18, Governor JB Pritzker, in his State of the State Address and State Budget Address, outlined a significant housing initiative that preempts local authority for land use and zoning for both home rule and non-home rule municipalities. Governor Pritzker's housing preemption proposals include statewide zoning standards, minimum lot sizes, mandates for increased residential density allowances, legalization of accessory dwelling units, limitations on minimum parking requirements, authorization of third-party plan reviewers and building inspectors and creation of a statewide formula related to impact fees. Governor Pritzker is proposing broad preemptions of local authority on issues that are entirely local when concerns with the cost or availability of housing are not caused by comprehensive planning and local zoning.

Illinois communities vary widely in geography, population density, infrastructure capacity and housing demand. Uniform statewide standards cannot adequately reflect those differences or the planning efforts underway or completed in many municipalities. Zoning and land use decisions are best made locally by the leaders elected in those communities. The Illinois Municipal League is advocating for the preservation of municipal housing authority.

IML Memo - Preserve Municipal Housing Authority

Governor JB Pritzker has proposed a broad preemption of local authority for land use and zoning. IML is asking all local officials to contact their State Representative and State Senator to voice opposition to Governor Pritzker's housing, land use and zoning proposals that will negatively impact all municipalities.
